-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Applicants' amendment filed April 20, 2004 has necessitated new grounds for restriction.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, 13 and 21 drawn to apparatus, classified in class 324, subclass 158.1.
- II. Claims 14 and 16-18, drawn to apparatus, classified in class 324, subclass 158.1.
- III. Claims 19, 20 and 22-26 drawn to apparatus, classified in class 324, subclass 158.1.

3. The inventions are distinct, each from the other because:

Inventions II in a First Set and I and III in a Second Set are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination can be made without a tongue and groove structure as described in claims 1 and 13. The subcombination has separate utility that does not require the use of a gasket as described in claim 14.

Inventions III and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination can be made without a tongue and groove structure as described in claims 1 and 13. The subcombination has separate utility that does not require a flat surface around at least a substantial portion of an outer edge region of a face of a housing that is part of the base as described in claims 19 and 20.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. A telephone call was made to the Office of the Attorney of Record on June 29, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2829

7. A shortened statutory period for response to this action is set to expire one month(s) from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133
